

Salty Sparkling Snowflakes

Equipment: salt, paper, scissors, plate, spoon, cup, hot water

Activity – To make a festive sparkling snowflake!

Instructions

- First, make a snowflake (or lots of snowflakes!) from a square of paper. Fold the paper again and again into triangles, then cut out small triangles from the edges.
- Then, add salt to hot water in a cup, keep adding and stirring until no more dissolves.
- Put your snowflake onto a plate and carefully just cover with your super saturated salt solution.
- Wait! The water shall evaporate, leaving sparkling square crystals on the top surface of your snowflake!
