THE FAMILY FIT CHALLENGE

The Research – less than 17.5% of children doing the recommended 60 active minutes a day.

A third of Children are overweight or obese by the time they leave primary school.

Data from the active lives survey indicates that only 17.5% of children are doing 60 minutes every day.

Only 30% of children achieve the 30 active minutes target daily.

The importance of physical activity in promoting children and young people's mental wellbeing is equally clear.

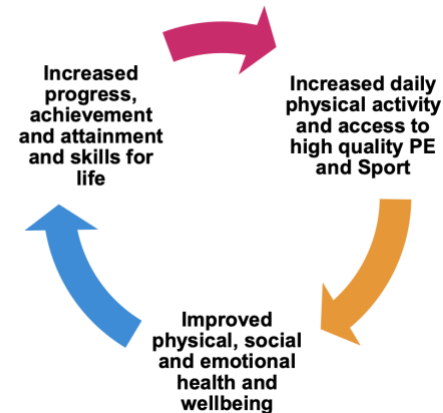

One in eight 5-to-19-year olds has at least one mental disorder. Physical and mental health are inextricably linked; numerous studies confirm a positive association between physical activity and increased self-esteem, emotional wellbeing.

Why Active 30:30?

Why Active 30:30?

The Family Fit challenge

The family fit challenge has been designed to help families and schools achieve 60 minutes a day of activity in a fun way.

We understand that families don't have access to all the same equipment schools and clubs do and therefore it has been designed for the whole family to be involved using everyday items.

The initial resource is to help families and schools during lockdown. We all know that juggling home learning and working amongst other commitments makes it difficult to think about other activities during the day.

There are 3 versions of the challenge, but you can adapt it to however it works for you. Please don't feel you have to follow it exactly. You may want to make it easier or harder.

Version 1 – The competition

Version 2 – The boardgame

Version 3 – The family edition

Version 1 – The competition, this is for the whole family to join in, but your school (via me) will send out a code every week to submit your children's scores. With the new code that is sent out weekly the winners of every year group will be announced. – You can print out the certificate in the pack to celebrate.

Version 2 – If you would like to just play the game at home use the board game squares to move along, when your child gets to 100 give them a little treat, read a story, play a game, watch a movie anything you can think of that your child would like. – You can print out the certificate in the pack to celebrate.

Version 3 – The family edition, the same as the first version but you don't need to submit your scores. Please however let your school know you are participating so that they can add this to their data. – You can print out the certificate in the pack to celebrate.

As mentioned, you may want to come up with your own challenges and therefore, I will also include a blank template.

The challenges are there for a little bit of fun but to help children towards there 60 active minutes a day.

Below are other resources to help you achieve the daily target:
